Dedicated and detail-oriented software developer, mastering advanced programming techniques with ambition and a positive attitude. With a solid foundation in both theoretical and practical aspects of software engineering, I am committed to applying my knowledge to real-world projects.

Throughout my academic and project-based experiences, I have gained comprehensive knowledge, which has equipped me with a well-rounded skill set, enabling me to contribute effectively to all phases of software development.

During my studies, I have participated in multiple team projects that enhanced my problem-solving skills and ability to work under pressure. Eager to bring my technical expertise and fresh perspectives to a dynamic team, I am well-prepared to contribute effectively to challenging software development projects.

## 🎓 Education

Fourth-year student,  
expected to graduate in  
October 2025
